"Analiza została wykonana dla ING Banku Śląskiego"

SpiraTest

ZALETY	Zintegrowany prosty bugtracker Zintegrowane zarządzanie wymaganiami
WADY	<p>Mało intuicyjny, „archaiczny” interfejs</p> <p>Brak importu i eksportu przypadków testowych</p> <p>Instalacja rozwiązania ograniczone tylko do rozwiązań Microsoft (technologia .net + serwer DB MSSQL)</p> <p>Ograniczona integracja z JIRA</p> <p>Brak zaawansowanego wyszukiwania (wyszukiwanie globalne)</p> <p>Uproszczone monitorowanie zadań</p>

Integracja przez synchronizację, nie można dodawać do JIRA, dodaje się do wewnętrznego narzędzia

SpiraTest

Synchronizacja z bugtrackerami

Data Synchronization [\(Refresh\)](#)

SpiraTest is able to communicate with a variety of external systems and applications using its background data synchronization service and library of available plug-ins.

This page allows you to view, add and modify the list of plug-ins, make changes to their configuration, and verify the status of the most recent synchronization. In addition, you can force a particular plug-in to perform a complete data-synchronization by resetting its date of last sync:

Plug-In	Data Mapping	Last Sync Date	Status	Operations
BugzillaDataSync	> View Project Mappings	-	Failure	> Force Re-Sync Edit Delete
FogBugzDataSync	> View Project Mappings	-	Failure	> Force Re-Sync Edit Delete
JiraDataSync	> View Project Mappings	2012-08-27 14:21:24	Success	> Force Re-Sync Edit Delete
MsTfsDataSync	> View Project Mappings	-	Failure	> Force Re-Sync Edit Delete

The 'Description' field contains the text: 'The ability to add new books into the system, complete with ISBN, publisher and other related information'. Other fields include 'Importance' (1 - Critical), 'Status' (Completed), 'Author' (Fred Bloggs), 'Release' (1.0.0.0.0001 - Iteration 001), 'Creation Date' (2003-12-01 00:00:00), 'Owner' (Joe P Smith), and 'Plan Effort' (15.0 hours).

Below the form is a table of associated artifacts. The table has columns: 'Artifact Name', 'Artifact Type', 'Creation Date', 'Creator', 'Comment', 'ID', and 'Edit'. It lists three artifacts: 'Cannot install system on Oracle 9i', 'Ability to delete existing books in the system', and 'Cannot add a new book to the system'.

On the left side, there is a sidebar with a tree view of the project structure, including 'Functional System Requirements', 'Online Library Management Sys', 'Book Management', 'Edition Management', and 'Author Management'.

Test Case Summary Report

This report displays all of the test cases defined for the current project in the order they appear in the test case list. The test case's details and execution status are displayed in a summary list form.

Project 1: Library Information System

Sample application that allows users to manage books, authors and lending records for a typical branch library

Test #	Name	Description	Priority	Status	Author	Owner	Automation Engine	Est. Duration	Created On	Last Modified	Last Executed	URL	Test Type
1	Functional Tests			N/A	Fred Bloggs	Fred Bloggs			01-Dec-2003	25-Jun-2012 14:55:59	01-Dec-2003		
2	Ability to create new book	Tests that the user can create a new book in the system	1 - Critical	Passed	Fred Bloggs	Fred Bloggs	Rapise	10	01-Dec-2003	01-Dec-2003	01-Dec-2003	http://www.libraryreferences.org	Functional Test
3	Ability to edit existing book	Tests that the user can login, view the details of a book, and then if he/she desires, make the necessary changes	1 - Critical	Caution	Fred Bloggs	Fred Bloggs	Rapise	5	01-Dec-2003	01-Dec-2003	01-Dec-2003		
4	Ability to create new author	Tests that the user can create a new author record in the system	1 - Critical	Failed	Fred Bloggs	Joe P Smith	Rapise	8	01-Dec-2003	01-Dec-2003	01-Dec-2003

Wyszukiwanie

The screenshot displays the SpiraTest web interface. At the top, the SpiraTest logo is on the left, and the user is logged in as 'System Administrator'. The navigation bar includes links for 'Library Information System', 'My Profile', 'Administration', 'Log Out', and a search bar containing the text 'test'. Below the navigation bar, a 'Search Results' modal window is open, showing 98 results matching the keyword 'test'. The results list includes various test cases and sets, such as 'TC33 - New Test Case', 'TX28 - New Test Set', and 'TX29 - New Test Set', each with a date from August 2012. The left sidebar contains tabs for 'Test Cases', 'Test Sets', 'Test Runs', and 'Auto', along with action buttons like 'Insert', 'Delete', 'Indent', and 'Outdent'.

SpiraTest

Integracja SpiraTest z HP QTP:

- minimalna obsługiwana wersja HP QTP 9.0+,
- instalacja programu RemoteLaunch na każdym komputerze (host), na którym będą uruchamiane testy automatyczne,
- instalacja Plug-In For HP QuickTest Pro,
- konfiguracja SpiraTest.

Test Automation Engines

SpiraTest is able to integrate with a variety of external test automation systems using its flexible, open architecture and library of available test automation engines.

This page allows you to view, add and modify the list of test automation engines and make changes to their configuration:

Engine Name	Token	Description	Active	Operations
Bad Boy	BadBoy2	Engine that integrates with Bad Boy	No	> Edit Delete
Command-Line	CommandLine	Engine that will execute a generic command-line executable	No	> Edit Delete
FitNesse	FitNesse	Engine that integrates with FitNesse framework	No	> Edit Delete
IBM RFT	RTFAutomationEngine	Engine that integrates with IBM Rational Functional Tester	No	> Edit Delete
JMeter	JMeter2	Engine that integrates with Apache JMeter	No	> Edit Delete
LoadRunner	LoadRunner11	Engine that integrates with HP LoadRunner 11.0+	No	> Edit Delete
NeoLoad	NeoLoad	Engine that integrates with NeoTys NeoLoad	No	> Edit Delete
Quick Test Pro	QuickTestPro9	Engine that integrates with HP Quick Test Pro 9.0+	Yes	> Edit Delete
Ranorex	RanorexEngine	Engine that integrates with Ranorex	No	> Edit Delete
Rapise			Yes	> Edit Delete
Selenium RC			Yes	> Edit Delete
